A highly motivated and skilled developer with a good programming background, I am eager to join a challenging environment that will allow me to further develop my skills while contributing to the success of the organization. I am enthusiastic, hardworking, and highly goal-oriented individual, with an ability to quickly learn new tools and skills.

## EDUCATION

### Bachelor's of Computer Science

National University of Computer and Emerging Sciences (FAST-NU), Lahore

08/2019 - Present

### F.Sc - Pre Engineering

Kips College, Lahore

08/2017 - 07/2019

## PROJECTS

### Rolling Rentals

- Currently working on a car rental platform that enables customers to list their cars for rent online, browse and book available cars, and allows car owners to manage their listings and bookings through an admin portal.
- Tools and Technologies(Node, Express, Bootstrap, REST API, VS Code)

### Tech Tonic an E-commerce website

- A web application project incorporated most of the functionalities of a fully functional e-commerce store such as cart, checkout, authentication, validation and payments.
- Tools and Technologies(Node, Express, Bootstrap, ejs, REST API, VS Code)

### Sudoku Game

- As part of semester project the goal was to create the console based game login/sign functionality using file handling.
- Tools and technologies(C++, Visual Studio)

### Tamagotchi Pet Game

- The virtual pet care game allows players to select a pet and engage in activities such as feeding, training, and playing with it. The game loop updates the pet's status and prompts the player to take actions to improve it. The player is presented with a menu of options and corresponding messages.
- Tools and technologies(C++, Visual Studio)

### Gym Management System

- As part of my semester project, designed and implemented the Gym Management System by creating an optimized Entity-Relationship (ER) diagram and connecting the databases with the front-end interface.
- Tools and technologies(.NET, SQL)

### TinCat

- Developed a clone landing page of famous website tindog with the functionalities of pricing and testimonials.
- Tools and technologies(HTML, CSS, Bootstrap)
